

Yuri Boldyrev

Unity Developer · Game Designer

Telegram @NEON_ner · Moscow, Russia

SUMMARY

Unity developer and game designer with 7+ years in game development. Grew from modding to the full development cycle: programming and engine porting, mobile optimization, level design and UI, leading QA and community, promotion. One of the developers of SOC_D, a mobile fan port of S.T.A.L.K.E.R. (100,000+ downloads, #2 in Shooters on RuStore in 2025). Currently the founder and lead of my own project XABAR, building its team.

EXPERIENCE

XABAR — Original project

Jan 2026 — present

Founder and project lead: game design, development, SMM, QA

A cross-platform immersive first-person shooter set in a post-apocalyptic world — single-player and multiplayer.

- Define the concept, game design and roadmap.
- Build and coordinate the team; set up development and testing processes.
- Run promotion and community from the early stages.

Stack: Unity 6 · C# · Git / GitHub · Blender · Trello

Roles: Project lead · Game designer · Programmer · DevOps · 3D modeler · QA · SMM

SOC_D — Non-commercial fan project

Aug 2022 — Oct 2025

Developer; lead of project administration and QA

A mobile port of S.T.A.L.K.E.R.: moved from the X-Ray engine to Unity, from C++ to C#.

- Programmed and ported game logic from C++ (X-Ray) to C# (Unity).
- Mobile optimization, level design, UI.
- Led project administration: chats, SMM, community management.
- Led the QA department: organized testing and build quality control.

100K+ downloads · **3M+** views in 9 months · **#2** in Shooters on RuStore, 2025

Stack: Unity · C# · C++ (X-Ray) · Trello

Roles: Programmer · DevOps · Level designer · UI designer · QA lead · Administration & SMM lead

Independent non-commercial fan project, not affiliated with or endorsed by GSC Game World. Development ended in October 2025.

Modding & pet projects

2019 — 2022

Mods and own Unity prototypes: C# programming, 3D modeling, level design.

SKILLS

Development: Gameplay programming, Mobile optimization, DevOps: builds, CI/CD, releases, 3D modeling

Game design & product: Game design, GDD, Level design, UI / UX, Roadmapping, Lean Canvas

Leadership & community: Development leadership, QA processes & testing, Community management, SMM, Publishing on RuStore

Tools: Unity 6, C#, Blender, GitHub, Trello, Claude Code

ACHIEVEMENTS

- 1st place — inter-university game jam “Ctrl + Shift + Create” (2026)
- 1st place — MTUCI game jam (2026)
- 1st place — MTUCI entrepreneurship training (2025)

EDUCATION

MTUCI (Moscow Technical University of Communications and Informatics)

Faculty of Information Technology

Business and applied information systems development (C#, C++)
